A.D 6 Implementations Constraints plan		
Factors	Constraints	Possible Solution
Hardware & Software Platforms	Limited to languages outlined in brief (Vanilla JavaScript, HTML, CSS)	Focus on functionality rather than aesthetics for MVP
Performance Requirements	 Project completed on Macbook App must be run on Google Chrome 	 Create ReadMe to ensure others can open the app Chrome must be installed with appropriate plugins
Persistent storage and transactions	 Limited to libraries and tools outlined (Express, Mongod) Data stored locally Data storage limited to machine memory/ram Lack of training in securing sensitive data 	 Work with API which in publically open Create a seeded database to populate the app Avoid using too large a database/API Avoid using sensitive data
Usability	 Site must be accessible to all User must use Google Chrome to access the app 	 UX planning to take into consideration the types of users the app would have Utilite alt text for visually impaired User friendly fonts and colour schemes
Budget	 No budget provided by client Free tools likely to have limitation/performance issues 	 Limited to using free tools which meet an agreed standard Design an MVP and agree with client on needs.
Time	Deadline of one week (Thursday 19th July 2018)	 Agile working - ensure team are all on the same page Stop, start, continue on MVP only Delegation of tasks
